

Former Gun-Carrying IRS Special Agent

His investigation confirmed, and the
IRS Commissioner refused to rebut,
incontrovertible evidence that:

**There is no law that makes the
average American living and
working in the United States
liable to pay the federal
income tax nor to file federal
income tax returns.**

This message is not meant to push you into a battle with the IRS and we are not suggesting that you file or not file any particular forms with the IRS.

Instead, it is meant to open your eyes to the undeniable truth that:

- (1) the IRS has illegally, deceitfully and knowingly stolen trillions of dollars from the American people;
- (2) that the U.S. Congress and the courts are complicit in this theft and
- (3) millions of Americans, along with a growing number of attorneys, CPAs, law enforcement personnel, and even former IRS criminal investigators like Joe Banister, are working to put a stop to this.

We will not tolerate our fellow Americans having their property stolen from them, nor being imprisoned for not paying an income tax they were not liable to pay, nor for not filing an income tax return they were not required to file.
